Year 97, Student Housing Manual amendment, meeting amended

Year 102, Student Housing Manual amendment, meeting established

1. In order to monitor how students stay in at nights and keep students, who stay-out (sleeping-out), safe, and in case of emergency of contact at convenience, when students want to stay-out (sleeping-out), they should notify their roommates, parents or guardian about the date of staying-out, reason, location/place, phone number and so on. This is for roommates or Student Housing counsellors to make sure whereabouts the student to achieve the goal of looking after each other.
2. After approval for accommodation, should make good use of beds resources. If it is found that there is empty bed for siesta or use other places for resting, the dormitory will no longer make available to that student if it has proved to be true. This does not include if the Student Housing counsellor has been informed in advance notice.
